On behalf of everyone at WWS, I want to emphatically thank [Rick Meyer](#), founder of the Telcommand Coaching System, for the communication system we received from his company. Both at the shows and at home, we have really found this system vastly helpful in allowing the student to hear coaching clearly even from the furthest point in the riding arena or warm up ring. The armbands are comfy and stay put even with bouncy trots, and there are no cumbersome ear pieces or head phones for the rider! Every coach/instructor would benefit from these units, and they are extremely easy to use! This product comes HIGHLY recommended by West-Winds Stable!
